Recognizing and Addressing Learning Disabilities at the High School and University Levels

This three day workshop will cover current theory and research regarding learning disabilities and effective instructional practices, with the goal of providing participants with practical knowledge that they can immediately put to work in the classroom or other educational settings. Participants will use case study information to learn how to translate current LD research into practical approaches for recognizing learning differences. Instructional approaches, including strategy instruction, assistive technology applications, universal design for instruction, and executive function coaching methods, will all be covered in depth. Participants will gain practical knowledge and tools to better support students with learning differences in a wide variety of educational contexts.

Day four will be reserved for individual consultations with the instructor.

Instructor

Dr. MacLean Gander

Vice President for Academic Affairs and Dean of College
Landmark College, Vermont, USA

Professor MacLean Gander has been the Vice President for Academic Affairs and Dean of the College at Landmark College since 1997. In addition to being the college's chief academic officer, he has also overseen student life (1999-2005) and Landmark's institute for research and training in an earlier stage of its development (1998 – 2001). During his time at Landmark, he has led developments in a number of areas, including the creation of the Landmark College approach to writing instruction, the development of a First-Year Experience program focused on issues of transition, an integrated model of collaboration between student affairs and academic affairs, and the integration of assistive technology across the college curriculum.
